

## AMENDMENTS TO THE SPECIFICATION

Please add the following new paragraphs after page 9, line 1:

Figures 13 and 14 list the main peaks in the high resolution MALDI mass spectra (negative mode) for the family of A-type IPGs isolated from liver after insulin stimulation. These peaks are also listed in tables 3 and 4, respectively.

Figure 15 lists the main peaks in the high resolution MALDI mass spectrum (positive mode) of the family of A-type IPGs. These peaks are also listed in table 5.
